COLLOQUIUM

4-5 p.m., Tuesday, 22 September 2009

School of Physics Common Room

Room 64, Old Main Building

John McLennan

UNSW School of Physics

"The Violin: Some Physics and Some Non-Physics"

The violin has a "Spiky" response which together with a "Spiky" input and the player's vibrato produces a uniform sound to the ear of the listener. The left hand makes the notes and the right hand makes the music. The best of today's violins are as good as any of the high priced classical violins.

The audience is invited to meet the speaker beforehand at 3.45 p.m. over coffee and biscuits in the Common Room.
